## Getting started with Google Sheets

A spreadsheet is a computer program that can capture, display and work with data arranged in rows and columns. Google Sheets allows you to organize, edit, and analyze different types of information using spreadsheets. To get started, please watch the video link below:

## To create a new Google spreadsheet

1. While viewing your Google Drive, click New

| Google | Seach Divive |  |
| :---: | :---: | :---: |
| $\triangle$ Drive | my Dive | 1 |
| nw | Neme $\uparrow$ |  |
| 5 m Fobe | getrposas |  |
| -itilembad | douts |  |
| Q coose ocos |  |  |
| Q cooses sheets of | ksteets |  |
|  |  | Iub frampopeet |
|  | 目 Aatcub | Wub Restere201-2012 | and select Google Sheets from the drop-down menu.

2. The spreadsheet will appear in a new browser tab.
3. To name your spreadsheet, locate and select Untitled spreadsheet at the top of the page. Type a name for your spreadsheet, then press Enter on your keyboard.
4. Whenever you need to view or edit your spreadsheet, you can access it again from your Google Drive, where it will be saved automatically.

You may notice that there is no save button. This is because Google Drive uses autosave, which automatically and immediately saves your files as you edit them.

## Spreadsheet Terms

Active cell: An active is the cell you are currently working on
Auto Sum: A formula that will add up a column of numbers
Cell: Each individual box on the spreadsheet
Cell Reference: The column letter and the row number of a cell
